Sassoon® Infant OpenType fonts

ALTERNATIVE LETTERS
These fonts have many sets of alternative letters which are important as they provide a selection of different letterforms for teachers to use fitting their chosen reading and handwriting policy.

In OpenType font terminology these alternatives are called 'Stylistic Sets' and are available when used with an OpenType compatible application. If the application used is not OpenType, only the Default letters will be available.

Access to the 'Stylistic Sets' feature may differ, depending on the program in use.

Examples are:

MICROSOFT® Word
Right-click the selected (highlighted) text.
Select Font, click Advanced tab.
Select one Set from 1 to 16.

TEXTEDIT (Mac)
Select text. Press Command T for font list. Click Font Panels Actions (cogwheel icon) > Typography… Choose from all available OpenType features Stylistic Sets, Ligatures etc., listed in the pop-up panel.

QUARK XPRESS (Mac)
From Menu Bar > Show Character Viewer. View: Glyph > Font: Sassoon.
Place insertion point in XP document then select glyph in Viewer > Insert with Font.
All alternatives are available for insertion in this way.

InDesign
select Type > Character.
Click the flyout menu > OpenType > Stylistic Sets.
Select one set form 1 to 16.

ILLUSTRATOR
Select text in document and show Font palette, click on OpenType tab > 'Stylistic Alternatives' for Set 1. Select 'Discretionary Ligatures' for Set 2. 'Ligatures' for fi, fl.

Sassoon families have different Default letters and therefore different arrangement within the Sets. The Sets shown below are avialable in all Sassoon Infant fonts.

Default: IJ&abcdefghijklmnopqrstuvwxyz1479

Set 1:   IJ&abcdefghijklmnopqɪstuvwxyz1479
